Mr Neil Laurie  
The Clerk of the Parliament  
Queensland Parliamentary Service  
Parliament House  
George Street  
BRISBANE QLD 4000

Dear Mr Laurie

Thank you for your letters forwarding a copy of the petitions received by the House regarding horse riding in the Mapleton Forest Reserve.

I recently announced new tenures to protect forests and allow riding in identified former forestry lands, including the following areas within an hour's drive of the Mapleton Forest Reserve:

- Parklands, Tuchekoi, Beerburum, Crohamhurst and Mooloolah Forest Reserves, of 1 351 hectares, will become Conservation Parks, which can allow horse-riding in perpetuity.
- Imbil, Walli, Parklands, West Cooroy and Woondum State Forests, with quite large areas remaining unaffected and open to riding, subject to rider and other stakeholder consultation when logging in these areas ceases over the next 20 years.
- Rider-identified trail areas of Mapleton, Bellthorpe, Conondale, Tewantin, Woondum, Kenilworth and Wrattens Forest Reserves, of 5 007 hectares, are National Park (Recovery) areas open to riding for up to nine years while alternative trails are identified.

Please refer to the attachments for full details of riding areas in the Mapleton area.

Our State has some of the most bio-diverse forests in Australia yet the nation's lowest level of forest protection. Our booming economy and population growth is placing ever greater pressures on our natural assets – pressures for development, recreation and protection.

The Government is determined to address these pressures in a balanced way. It recently announced a number of initiatives, including the SEQ Regional Plan, with objectives to better sustain economic growth, our Queensland lifestyle and our world-class environment.

...2/

Ongoing implementation of the 1999 SEQ Forests Agreement (SEQFA) is wholly consistent with these objectives. After significant consultation with all stakeholders, it is providing:

- transition for the timber industry with 'one last cut' over the next 20 years from old-growth forest areas while alternative supplies from plantations are developed;
- provision of opportunities for recreational activities, including horse-riding; and
- greater protection of forest species and the forest-based tourism industry.

Recreational opportunity has been provided for a wide range of uses, including horse-riding, walking, hiking, cycling, trail-biking, four-wheel driving, orienteering and abseiling.

The Beattie Government recognises the recreational, cultural and economic value of horse riding and has provided more than \$8 544 719 to support recreational horse riding across the State, including \$5 939 388 for purpose built facilities for a range of riding disciplines.

The Beattie Government's support is also more than financial. It has consulted on and incorporated rider input into the recent SEQFA announcement, including retention of riding areas in 62 State forests, creation of a special land tenure in 16 *National Park (Recovery)* areas and conversion of 17 State forests to conservation park tenure which allow riding in perpetuity. These elements were a result of positive negotiation and consultation with riders.

It is recognised new national parks are not available to horse riders. However, national parks represent approximately only 4% of Queensland. New SEQFA national parks are the third most bio-diverse forests in Australia and deserve the highest possible protection. National park status provides this protection. For decades, neither horses nor other non-native animals have been specifically allowed in national parks, a position maintained by Governments of all political persuasions.

Our forebears established this policy and good reasons remain for it to continue. Many species are in decline – in fact, so many SEQ forest species are in decline they are a third of the State's listed rare, vulnerable or endangered species. While threats faced by these animals are imperfectly understood, this is insufficient reason to delay or weaken protection.

Rather, it is imperative we strengthen protection and restore natural conditions to the extent practicable. Consequently, the Beattie Government has stepped up park ranger numbers by 142 or 30% to better manage park, fire and pest risks. We will also spend around \$10 million on fire and pest management in 2004-05, including an extra \$6 million over three years to fulfil the *2004 Enhanced Pest and Fire Management* election commitment.

The challenge is to balance the importance of riding with ecological protection. Consequently, the Beattie Government has announced a new partnership with rider representatives to identify alternative riding trails as soon as possible, preferably within 12 months. It also has allocated \$650 000 to establish alternative off-reserve trail rides.

I hope this information is helpful to you.

Yours sincerely

**Desley Boyle MP**  
**Minister for Environment**  
**Minister for Local Government and Planning**  
**Minister for Women**
